

Cybrium Capabilities Overview

Cybrium is a technology solutions provider specializing in Identity and Access Management (IAM), Salesforce services, and Full-Stack Application Development. Our team of certified professionals empowers businesses to achieve digital transformation with secure, scalable, and customized solutions.

Capabilities

Identity and Access Management (IAM) Solutions

- ✓ **End-to-End IAM Implementation:** Expertise in platforms like Okta, SailPoint, Microsoft Entra ID, Auth0, and IBM Verify.
- ✓ **Identity Lifecycle Management:** Automated provisioning, RBAC, and synchronization with HR systems.
- ✓ **Access Management & Single Sign-On (SSO):** Centralized authentication with adaptive MFA for enhanced security.
- ✓ **Privileged Access Management (PAM):** Implementing solutions to safeguard, monitor, and control privileged access to critical systems, reducing the risk of insider threats and breaches.
- ✓ **Governance & Compliance:** Identity governance with tools like SailPoint, access reviews, and regulatory compliance.
- ✓ **Migration & Modernization Services:** Smooth transition from legacy IAM systems to cloud-based platforms.
- ✓ **Managed IAM Services:** 24x7 monitoring, proactive issue resolution, and SLA-driven support.

Salesforce Services

- ✓ Salesforce Implementation & Customization
- ✓ Salesforce Administration & Support
- ✓ Salesforce Analytics & Insights

Full-Stack Application Development

- ✓ Custom Web & Mobile Application Development
- ✓ Expertise in frameworks like React, Angular, Vue.js, Node.js, and Django.
- ✓ Mobile app development for iOS and Android using React Native and Flutter.
- ✓ Cloud-Native & Microservices Architecture
- ✓ Development of scalable, cloud-native solutions on AWS, Azure, or Google Cloud.
- ✓ Microservices-based design for improved agility and scalability.
- ✓ Enterprise Application Development
- ✓ DevOps Integration
- ✓ CI/CD pipeline implementation for faster delivery and reliable releases.
- ✓ Infrastructure automation using tools like Jenkins, Docker, and Kubernetes.

Identity & Access Management

End-to-End IAM Implementation

- ✓ Seamless integration of IAM platforms with your business applications.
- ✓ Expertise in deploying Okta, SailPoint, Microsoft Entra ID, Auth0, and IBM Verify.
- ✓ Custom workflows and configurations tailored to your organizational needs.

Identity Lifecycle Management

- ✓ Automated provisioning and deprovisioning for users across all systems.
- ✓ Role-based access control (RBAC) and policy management.
- ✓ Real-time synchronization of identity data with HR systems and directories.

Access Management & Single Sign-On (SSO)

- ✓ Centralized authentication with SSO for streamlined user access.
- ✓ Adaptive and context-aware access policies for enhanced security.
- ✓ MFA implementation to meet compliance requirements without compromising user experience.
- ✓ Secure and control privileged accounts with tools like CyberArk.

Privileged Access Management (PAM)

- ✓ Secure and control privileged accounts with tools like CyberArk.
- ✓ Real-time monitoring and session recording of privileged activities.
- ✓ Automated credential rotation and vaulting for sensitive accounts.
- ✓ Risk analysis and least privilege enforcement to minimize security threats.

Governance & Compliance

- ✓ Comprehensive identity governance with SailPoint and other leading tools.
- ✓ Periodic access reviews and audit trails to meet regulatory standards like GDPR, SOX, and HIPAA.
- ✓ Real-time compliance reporting and risk management.

Migration & Modernization Services

- ✓ Expertise in transitioning legacy IAM systems to modern cloud-based platforms.
- ✓ Hybrid IAM solutions for organizations balancing on-premises and cloud environments.
- ✓ Smooth migration between IBM ISAM, custom-built solutions, or other IAM platforms like Okta or Auth0.

Adaptive Multi-Factor Authentication (MFA)

- ✓ Implementation of advanced MFA techniques such as biometrics, push notifications, and OTPs.
- ✓ Risk-based authentication to enhance security without user friction.
- ✓ MFA solutions tailored for both workforce and customer IAM.

Managed IAM Services

- ✓ 24x7 monitoring and support for IAM environments.
- ✓ Proactive issue resolution and SLA-driven services.
- ✓ Regular updates and patches to ensure high availability and security.

Identity Analytics & Insights

- ✓ Advanced analytics for access patterns and potential security risks.
- ✓ Insights into user behavior to inform policy decisions.
- ✓ Tools for continuous improvement of IAM processes.

Why Choose Cybrium?

Multi-Domain Expertise: A single partner for IAM, Salesforce, and Full-Stack Development services.

Customer-Centric Approach: Tailored solutions to meet your unique business challenges.

Certified Professionals: Team of highly skilled experts across leading technologies.

Our Technology Stack

Domain	Technologies & Platforms
IAM	Okta, SailPoint, Microsoft Entra ID, Auth0, IBM Verify, CyberArk
Salesforce	Apex, Visualforce, Lightning, Salesforce Einstein, Pardot, Sales Cloud, Service Cloud, Health Cloud, Marketing Cloud
Full-Stack Dev	React, Angular, Vue.js, Node.js, Django, Flutter, React Native, AWS, Azure, GCP
